

Transparency and control
from farm to fork.

Softproviding Meat:
A slice of SAP intelligence specifically
for the protein industry.

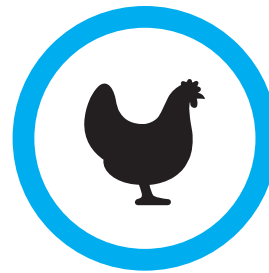

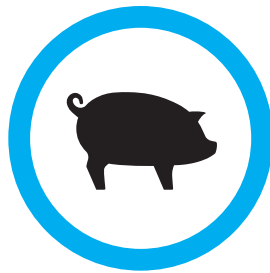

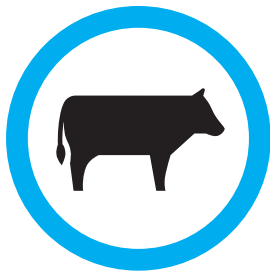

Think ahead. Go there.

Softproviding Meat. Making the business of meat a pleasure right down the line.

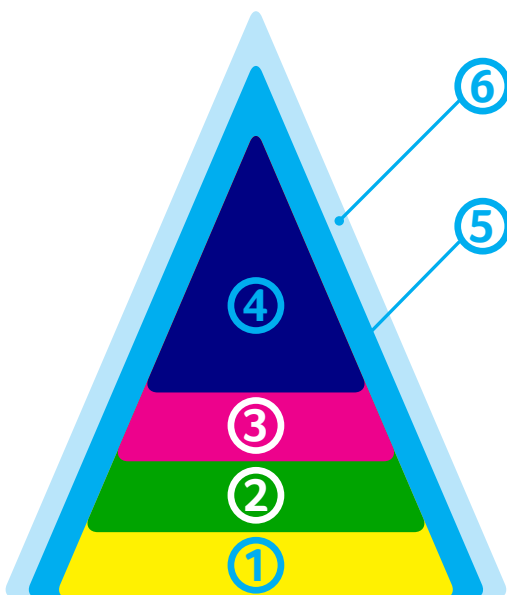

Meat has a special place in the food industry. A fresh product is taken and manufactured with a high regard for processing and shelf life. Regulatory standards and requirements must be strictly upheld and there is a constant need to deal with ever-changing variations in procurement and sales markets.

Handling meat is also a challenge when it comes to logistics: the route taken from livestock to consumable foodstuff, in all its variations, is logistically complex and can be broken down into a multitude of procedural steps. The requirements for managing and controlling the flow of production, information and value are correspondingly high.

For around 15 years, our company has been working in detail on the issues relating to production and distribution logistics for the meat industry. As a confirmed expert on industry-specific conditions and requirements, we have developed Softproviding Meat, a comprehensive solution that covers the entire process, from farm to fork.

Keeping your business running efficiently with Softproviding Meat.

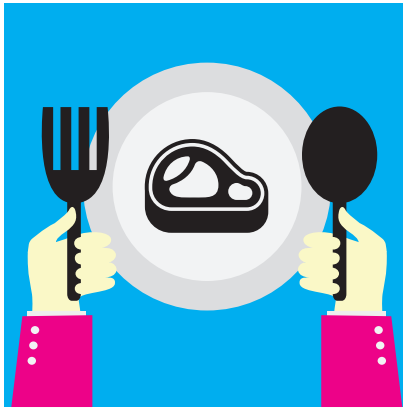

The aim: systematic integration.

Softproviding Meat links all the process steps throughout the entire supply chain and reproduces processes in their entirety. Solution design is completely open and includes everyone involved: from vendors, such as breeders and suppliers, to customers, such as trade partners and consumers. Interconnection with subcontractors is also possible, if required.

- 4 Softproviding Meat
- 3 Softproviding Link
- 2 SAP ERP (functional layer)
- 1 SAP NetWeaver (technical layer)

SAP Meat Management by msg

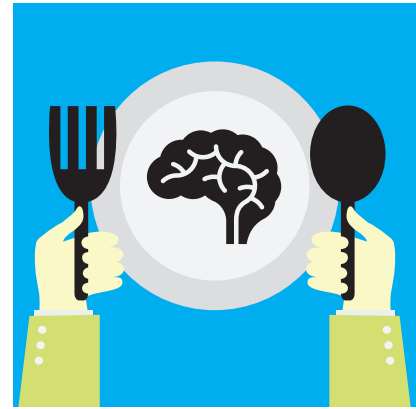

Softproviding Meat Industry-specific

Reproduction of entire process from breeding/rearing to livestock procurement, slaughtering and disassembly, right through to distribution

Softproviding Core Across industries

Supports planning, production process, picking, packaging, labelling, including data acquisition and mobile computing

Softproviding Link Across industries

Flexible localization of processes and functionalities of ERP main system for reliability (fail-safe solution) and targeted scalability

Functionality: plenty of meat on the bone.

In conjunction with the software modules Softproviding Core and SAP ERP Standard, Softproviding Meat provides a multitude of functions. It focuses on the areas of rearing and livestock procurement, including slaughtering and accounting, disassembly and production (processing), the purchase and sale of fresh meat and picking and packaging. This system provides comprehensive support for planning, cost accounting, controlling, optimization and process data acquisition.

The industry solution SAP Meat Management by msg with VBR status: a first-class reference which goes far beyond the meat industry.

Softproviding is one of the few software providers with whom SAP has entered into a partnership agreement for software development: as of September 2016, SAP Meat Management by msg features on the SAP price list and is being distributed globally via SAP Sales. The Meat Management solution was included in SAP's official product portfolio as a SAP Vendor Branded Reseller (VBR) product.

“Disassembly is a critical factor in the production process. Softproviding Meat gives us full transparency as the software provides us with reliable real-time data on costs and yield.”

The benefits to you: transparency, efficiency and security.

With Softproviding Meat, you are constantly aware of the status of production and distribution processes, whilst quality and costs remain permanently within your control. The data provided is always current, allowing you flexibility in your response to fluctuations in the procurement and sales markets.

SAP Vendor Branded Reseller (VBR) products use SAP ERP and SAP NetWeaver as platforms and are fully compatible with SAP software products. They have undergone a rigorous qualification process and offer companies working with SAP additional functionality and greater flexibility.

Great ideas are always simple – Softproviding simply makes them happen.

Softproviding AG, with its head office in Basel, Switzerland and part of the globally positioned msg group, is a software and IT consultancy company with an international focus. The company was established in 2000 with the idea of developing a comprehensive industry solution for the protein industry based on SAP. Since then, we have become the world's leading provider in this sector. In 2005, we were able to extend our expertise into other sectors. Today, our customers range from manufacturers of herbal lozenges to high-tech elevators.

Our business has grown in line with our customers' requirements. In the process, we have developed an in-depth understanding of business processes and solutions. Our aim is to help our customers progress and make them more successful. We see IT technologies as a means to an end. They only make sense if they contribute to the success of your business. We are there for you when you need us. We provide first-class services, such as automatic updates and round-the-clock support, as well as ideas and suggestions for the development of your projects and visions.

The Softproviding Meat industry solution combines a pioneering spirit and innovation with the experience gained across four continents from successful projects with leading companies in the protein industry.
